HP Professional Satin Photo Paper 300 GSM

Print limited edition photographs, using an elegant satin paper designed to deliver highly saturated prints by offering maximum ink coverage and a high D-Max for true photographic reproductions. Enjoy rich blacks and consistent colours, with this bright-white paper. It has a consistent gloss uniformity and produces long-lasting photos when used with HP pigment inks, making it ideal for printing archival-quality photographs.

Photographs printed on HP Professional Satin Photo Paper with HP Vivera pigment inks feature archival-quality fade resistance and exceptional water, smudge and humidity resistance. Certified by Wilhelm Imaging Research. This paper looks and feels like traditional C-Type papers.

Hahnemühle Photo Rag Ultra Smooth Paper 305 GSM

Mould-made, 100% Cotton, Acid free, extra smooth surface.

Photo Rag Ultra Smooth offers the highest archival standards. Its smooth surface texture, colour and improved inkjet coating enhance any artwork and guarantee an extremely large colour gamut, ink limit and density.

With its extra smooth surface is particularly interesting for users who want proven Photo Rag quality but with less texture and a brighter white point. Photo Rag Ultra Smooth lends itself particularly well to premium photo prints, art reproduction and digital art, both in colour and black and white.

Hahnemühle Photo Rag Baryta 315 GSM

Mould-made, 100% Cotton, Acid free, Smooth "Baryta" Gloss.

Photo Rag Baryta consists of 100% cotton and offers the unique "touch and feel" experience of Hahnemühle's genuine art papers. Using barium sulphate in the inkjet coating ensures the typical gloss that makes this paper a genuine replacement for traditional Baryta papers from analogue laboratories. Its premium formulation allows for a large colour gamut with high image definition and 3-dimensional colour depth. The paper's unique glossy, baryta surface and white tone lends itself perfectly to black and white prints with an extremely high dmax and finest grey tones as well as lustre colour images. Its premium inkjet coating also offers a very high level of water resistance.

Canson Infinity Baryta Photographique 310 GSM

pH neutral, Satin surface, Barium sulphate coated on one side.

Baryta Photographique is a true Baryta paper developed for inkjet technology. It consists of an alpha-cellulose, acid-free pure white paper with the same barium sulphate coating as for traditional silver halide and a premium inkjet colour receiver layer. This museum grade photo paper shows excellent black density and great image sharpness, making it ideal for black and white photography.
